KARRATHA TAFE SECURE VEHICLE COMPOUND

Design and construct project management in regional WA

CareyMC was awarded the contract to design and construct a secure vehicle compound at Karratha TAFE. The compound was required to provide a safe parking facility for 20 fleet vehicles and a bus. CareyMC managed the full scope of works providing design and site management throughout the project.

The scope of works included:

- Complete design of the facility in compliance with stakeholder requirements, City of Karratha local laws, Building Code of Australia regulations and applicable Australian Standards
- Supply of road base and fill materials including sub-base and base course
- Site preparation earthworks including compaction and drainage

- Concrete pavement construction including dowelled and keyed construction joints throughout
- New electrical distribution board for connection of the facility to existing site supply
- CCTV, security lighting and security access systems
- Design and installation of security fencing and automatic security gates complete with swipe card access.

Throughout the project CareyMC supported the Karratha business community through the engagement of local subcontractors. CareyMC's integrated project management systems and hands on involvement at all stages of the project ensured the works were delivered in a timely and professional manner, meeting the client's specifications and expectations.
